Note: Product not in stock is subject to freight charges.

- Five models are available from a 1.5 ton model, which is ideal for landscaping or light construction use up to an 8 ton model which is built rugged enough for most farm or construction needs.
- All models feature removable hinged tailgates, removable side panels and swivel clevis type hitch. Tongue Jacks are standard on all models.
- All tandem axle models feature a center pivot walking tandem axle, which allows uniform load distribution on uneven terrain.
- The 4 and 5 ton models feature a unique 3-way dumping design. This is possible by the use of an oscillation telescopic single acting cylinder. The dumping pattern can be changed from rear to right or left by the simple placement of two hinge pins.
